GLOSSARY

Total Expense Ratio (TER): A measure of the total costs associated with managing and operating the fund. The TER consists primarily of the management fee (which covers costs for maintaining the fund such as trustee, custodial, and accounting fees) plus other operating expenses. It is expressed as a percentage of the fund's total net asset value.

Product structure: Indicates whether the fund buys the actual underlying securities in the index (i.e. Physical) or whether the fund gains exposure to those securities by buying derivatives, such as swaps (known as 'synthetic').

Methodology: Indicates whether the product is holding all index securities in the same weight as the index (replicating) or whether an optimised subset of index securities is used (optimised/sampled) in order to efficiently track index performance.

Market capitalisation: The aggregate value of a stock calculated by multiplying the number of shares outstanding by the current price. For the fund, this is the sum of the market capitalisation of each stock held by the fund.

Weighted average market cap: The weighted average market capitalisation of all stocks held by the fund.

Price earnings ratio (P/E): The share price of a stock divided by its earnings per share (EPS) over the past year. For the fund, this is the weighted average P/E ratio of all stocks held in the fund. Stocks with negative P/E ratios are excluded from the calculation.

Price book ratio (P/B): The share price of a stock divided by its book value per share. For the fund, this is the weighted average P/B ratio of all stocks held in the fund.

Return on equity: This is the amount of net income of a company expressed as a percentage of shareholders' equity. It reveals how much profit a company generates with the money shareholders have invested. For the fund, this is the weighted average return on equity of all stocks held in the fund. Stocks with a negative return on equity are excluded from the calculation.

Dividend yield (Trailing 12 months): The measurement of cash flow an investor would have received if they had held the fund over the last twelve months. The trailing 12-month yield is the sum of distributions made by the fund over the past twelve months divided by the most recent net asset value (NAV) of the fund.

Earnings growth rate: A measure of growth in a company's net income over a specific period of time. For the fund, this is the weighted average growth rate of all stocks held in the fund. Stocks with a negative growth rate are excluded from the calculation.
